Hi Cara,

Thanks for speaking with me over the phone.

With regards to CEO Notices under the Waste Avoidance and Resource Recovery Regulations 2008, we would just like to clarify the following question:

What is the definition of recovery in relation to waste to energy?

Eg: Does Recovery include recycled bottom ash only or will stack emissions also be included in the definition of Recovery?

Based on the WA Waste Strategy Definitions:

- A. **Recovered excluding EfW = Tonnes recovered and beneficially re-used (compost, mulch, recyclables) / Tonnes processed**
- B. **Recovered including EfW (i.e. bottom ash only) = Tonnes recovered and beneficially re-used (compost, mulch, recyclables & bottom ash) / Tonnes processed**
- C. **Diverted including EfW (i.e. bottom ash and stack emissions) = Tonnes processed - Tonnes landfilled / Tonnes processed**

Kindly shed more light on the above.

I have decided to send you an email instead of filling up the survey since we only have one question which needs clarification.

Thanks.

Kind regards,

Victor Chan
